This statement is to confirm that the substances, with the exception of graphite (CAS# 7782-42-5) *, listed within the GADSL Critical Raw Materials List (As published on [IMDS Information Pages - GADSL - CRM - IMDS Public Pages \(mdsystem.com\)](#) on 21-July-2023) have not been intentionally added or used in the manufacturing processes of the Victrex products detailed above and to the best of our knowledge at this time, have not been intentionally added or used in the manufacturing processes of any included additives.

* The GADSL Critical Raw Materials lists 'Natural Graphite (CAS# 7782-42-5)'. Graphite is used in some of the Victrex products listed above. Only 'Synthetic Graphite' is used as an additive in the graphite containing Victrex products.

Some of these chemicals may of course be present at extremely low and normal background levels as typically found in the industrialised world. Wherever possible, quantitative analysis performed has shown measured levels of key elements to be well below the specified threshold.
